SUMMARY

Mechatronics graduate with a passion for continuous learning and a strong desire to transition into the software development field. Eager to leverage my analytical mindset, problem-solving abilities, and interdisciplinary background to contribute to innovative projects in the IT industry. Proven adaptability and a natural curiosity for emerging technologies make me a quick learner, poised to excel in a dynamic and collaborative software development role

EDUCATION

Great Learning Academy

Java Full Stack Development Program
2023 Oct- Current

Lovely Professional University

B.Tech in Mechatronics Engineering
2019-2023
8.41 CGPA

The Baker Vidyapeed, Kottayam

XII Standard(PCMC), 84.7%

The Baker Vidyapeed, Kottayam

X Standard, 10 CGPA

TECHNICAL SKILLS

- Languages: Java, JavaScript, Python, MySQL
- Web Development: React, HTML ,CSS, SCSS, Bootstrap
- Frameworks and Libraries: Spring Boot, Spring MVC, Spring Security
- Other Skills: Data Structures and Algorithms, Git and GitHub, Linux

LANGUAGES

- English
- Malayalam
- Hindi
- Tamil

PROJECTS

Expense Tracker Application

- **Description**: Designed and implemented a robust Full Stack application utilizing Spring Boot for the backend, and React for the frontend.
- Implemented Spring Security to manage authentication and authorization processes, ensuring a secure and controlled access environment. Utilized JWT for effective authorization within the application.
- Used Chart.js for data visualization and managed states using global context.
- **Skillsets**: Spring Boot, Spring Security, React, SCSS, Styled Components
- **https://github.com/kashyapkr/EXPENSE_APP**

ToDo Application

- **Description**: Created a fully fledged application using Spring Boot for the server side, and React for the frontend.
- Implemented Spring Security for basic authentication, and JWT for role based authorization.
- **Skillsets**: Spring Boot, Spring Security, React, Bootstrap, CSS.
- **https://github.com/kashyapkr/TO-DO-app**

Student Management System

- **Description**: Developed a full stack Student Management System using Spring Boot for backend and Thymeleaf as the server-side template engine.
- **Skillsets**: Spring Boot, Thymeleaf, Bootstrap
- **https://github.com/kashyapkr/StudentManagement**
